SUMMARY

Full Stack Developer with 1.5+ years of experience building scalable, responsive web applications using React.js, Next.js, TypeScript, Node.js, and Express.js. Experienced in designing reusable component architectures, integrating RESTful APIs, implementing secure JWT authentication, optimizing application performance, and collaborating in Agile teams. Passionate about building high-quality user experiences and solving complex frontend challenges

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript
Frontend Technologies: React.js, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend Technologies: Node.js, Express.js, REST API Development
Databases: PostgreSQL, MySQL, MongoDB
State Management & Data Fetching: Redux Toolkit, React Query (TanStack Query)
Authentication: JWT, Role-Based Access Control (RBAC)
AI & Modern Development: OpenAI API Google Gemini API AI Feature Integration Cursor AI OpenAI Codex AI-Assisted Development
Testing: Jest, Unit Testing
DevOps & Cloud: Docker, Docker Compose, GitHub Actions (CI/CD)
Developer Tools: Git, GitHub, Postman, Jira
Core Concepts: Responsive Design, Component Architecture, Performance Architecture, Performance Optimization, API Integration, Error Handling, Database Design, Agile (Scrum)

EXPERIENCE

Junior Full Stack Developer
***Karavya Solutions LLP, Ahmedabad, Gujarat* | July 2025 – Present**

- Developed scalable full-stack web applications using React.js, Node.js following reusable component architecture.
- Designed and integrated RESTful APIs with middleware, input validation, authentication, and standardized error handling.
- Implemented JWT-based authentication and role-based authorization to secure application access.
- Improved application performance by reducing unnecessary API requests using React Query caching.
- Transformed Figma designs into responsive and reusable UI components using Tailwind CSS.
- Improved application performance by optimizing component rendering and API data handling.

Junior Frontend Developer
***Slang Media, Morbi, Gujarat* | Sept 2024 – April 2025**

- Built responsive, cross-browser compatible user interfaces from Figma designs using React.js, Tailwind CSS, and Bootstrap.
- Integrated frontend with backend REST APIs built using Node.js and Express.js.
- Ensured cross-browser compatibility and implemented mobile-first responsive design.
- Improved frontend performance through component optimization, lazy loading, and minimizing unnecessary re-renders.

Frontend Developer Intern
***Slang Media, Morbi, Gujarat* | July 2024 – Sept 2024**

- Assisted in development of React.js applications with REST API integration.
- Built reusable and modular UI components using Tailwind CSS and Bootstrap.
- Gained experience in Git version control, debugging, and Agile development workflows.

PROJECTS

HRM & Task Management System

Tech Stack
React.js • TypeScript • Redux Toolkit • React Query • Tailwind CSS • Node.js • Express.js

Description

- Developed a production-ready HRM platform for employee and task management with workflow tracking and role-based access control.
- Built reusable React components and integrated RESTful APIs for employee, task, and attendance management.
- Optimized application performance using Redux Toolkit and React Query for efficient state management and API caching.
- Converted Figma designs into responsive, mobile-friendly interfaces using Tailwind CSS.

Catloga – Digital Tile Catalogue Platform

Tech Stack

React.js • Three.js • PostgreSQL • Tailwind CSS • Node.js

Description

- Developed a digital tile catalogue platform enabling customers to explore products through interactive visual experiences.
- Implemented 360° room visualization using Three.js to preview tile placement in realistic environments.
- Built tile replacement and room customization features for real-time design exploration.
- Integrated backend APIs and optimized rendering performance for smooth 3D interactions.

Moodify

Tech Stack
Next.js • React • TypeScript • OpenAI/Gemini API • Tailwind CSS

Description

- Built an AI-powered music recommendation platform that generates personalized playlists based on user mood.
- Integrated LLM APIs to generate song suggestions using natural language prompts.
- Designed responsive interfaces for mood selection and personalized recommendation workflows.
- Implemented asynchronous API handling and optimized user experience with efficient loading states.

InfiniteNotes

Tech Stack
Next.js • React • TypeScript • PostgreSQL • AI APIs

Description

- Developing a modern platform for musicians to discover, learn, and organize songs with AI-assisted music tools.
- Building intelligent features including AI-generated guitar chords, chord recognition, and personalized music learning assistance.
- Designing scalable architecture to support live chord generation, instrument tuning, and interactive practice sessions.
- Focusing on responsive UI, reusable component architecture, and performance optimization.

EDUCATION

Bachelor of Engineering (BE) in Information Technology
Lukhdhirji Engineering College – Morbi-2(GTU) | CGPA: 8.22 | 2025
